

## **GAS CONSUMPTION GUIDELINES**

The following consumption figures should be regarded as a **guide only** and are based on the assumption that the appliance is working at maximum output.

The appliances are all propane equipment (red cylinders & red regulators)

### **Small double boiling ring**

0.4kg per hour

13kg cylinder = 32.5 hours

### **Large double boiling ring**

1kg per hour

13kg cylinder = 13 hours

### **Cinders large BBQ gas**

1.5kg per hour

13kg cylinder = 8.5 hours

### **Cinders small BBQ gas**

0.75kg per hour

13g cylinder = 17 hours

### **6 burner gas oven**

2.30kg per hour

19kg cylinder = 8.25 hours

Manufacturer recommends the use of a 19kg cylinder only to maintain full pressure in operation
